Write a 10-12 page research paper on the following topic. Your essay must cite three external sources and use the APA citation format.

Pick an American immigrant group and a specific problem it faces or faced. Then write a paper analyzing the problem using Zlolsniñski’s theory of the relationship between structure and agency.

You will have two special opportunities to explore the Ames Library’s research resources while writing your paper.

We will meet with Professor Chris Sweet of the Ames library on Tuesday November 17 at 10:50 (first floor lab) to learn how to use search engines to locate books and articles. Then you will meet with Professor Sweet again in the Ames lab on Tuesday November 24 to seek his assistance on deepening your research and locating books and articles more specific to your topic.

Students will meet in conference with me in CLA 251 on Friday November 20 to get their research group and problem approved. My main concern is to be sure you have a sufficiently narrow problem to complete a paper in three weeks.

A draft of your paper is due for peer review in class on December 3.

Your final version is due—along with all drafts—in the box outside CLA on December 11 by 3:15 PM.
